

Objective

Data analyst with strong background in research design, manipulation of large data sets, macro/micro economic analysis, applied econometric techniques, and data processing system development and maintenance. Experience in working with diverse international teams, conflict resolution and data analytics with a passion for administration. Currently seeking a position with an international organisation that will allow me to develop my skills and full potential.

Work Experience

ECONOMIST at Moody's Analytics - Prague, Czech Republic Jul 17 - Present

- Development, implementation and validation of market risk and credit risk models.
- Development of analytics prototypes and benchmarks for testing.
- In-depth research and forecasting for international economies.

ECONOMETRICIAN at TESLA (Europe) Ltd - London, UK Jul 15 – Jul 17

- Energy demand forecasting model creation and maintenance. Statistical calibration of highly parameterized weather driven regression models.
- Weather impact and decomposition analysis for Distribution Network Operators in the UK.
- Data processing system development and maintenance (data processing scripts and automated tools, data base systems, product delivery systems).
- Project research and development.
- Customer interaction and client meetings (the role requires good communication and analytical skills to describe detailed statistical analysis in a concise manner).
- Daily manipulation of large data sets using SQL and VBA (quality assessment, analysis and evaluation - supporting the solution system requires a good knowledge of UNIX, batch files scripts and AWK).

JUNIOR ANALYST at Athena Infonomics - Chennai, India Nov 14 - May 15

- Support on technical assistance projects - located in Chennai, New Delhi and Bengaluru - involving macro and micro data processing and applied quantitative analysis.
- Adept at critically evaluating and implementing technical approaches related to gender, foreign trade, urban infrastructure and education.
- Gained significant experience in statistical software (e.g. EViews, Stata, MS Excel).
- Prepare case studies, project reports and make presentations.
- Organize workshops/conferences and prepare meetings with clients, experts and other project holders.
- Further developed critical core interpersonal and teamwork skills, building cooperative relation-ships with internal and external counterparts.

TRAINEE DATA ANALYST at United Nations Development Programme - Addis Ababa, Ethiopia Apr 14 - Sep 14

- Support UNDP's work on integrated climate change strategies, climate resilient livelihoods and project research.
- Support GLECRDS Regional Technical Advisors with project reviews including compiling critical information on project results and impacts.
- Monitoring, analyzing and reporting project results.
- Economic data analysis.
- Prepare case studies for UNDP publications.
- Maintaining existing data bases up to date.
- Participate and contribute to weekly team meetings on project budgets, activities and recommended cost effective solutions on the annual work plan.

MARKETING ASSOCIATE at Zwitter Pharmaceuticals - Volos, Greece

Mar 09 - Mar 11

- Identify and analyze competition, research new target markets and develop business strategies.
- Allocate expenses between products and the required sales promotion tactics with respect to annual profits, and prepare monthly reports (introduced a new analytical tool using time series data on sales and marketing to estimate the impact of various promotional strategies on sales).
- Analyze data and provide sales forecast.
- Organize training events and manage tight schedules, ensuring all deadlines are met.
- Extract, compile and clean data for research on patients.
- Participate and contribute to weekly team meetings on project budgets, activities and recommended cost effective solutions on the annual work plan.
